Experience

Sr. Software Engineer & Consultant **Jan 2024 – Present**
TypeFox GmbH *Germany (Remote)*

- Design and deliver custom Langium DSLs, type systems, and code generators (compilers)
- Founded Langium AI, an Eclipse Foundation project, supports building AI apps that leverage Langium DSLs; featured in the Foundation's open-source AI efforts (aieclipse.org)
- Project lead for multiple Langium projects, primary point of contact for U.S. and European clients
- Provide consultation for Langium and AI applications leveraging Langium
- Drive research & development of AI-augmented language-engineering workflows, harness development, and general software tooling
- Co-authored *Langium: A TypeScript-Based Language Workbench for Domain-Specific Languages* (MODELS Companion '26, ACM)
- Conference speaker for the Langium ecosystem (OCX 2026, LangDev); Linux Foundation contributor (PL/I language support)

Language Engineer **Jan 2022 – Jan 2024**
TypeFox GmbH *Germany (Remote)*

- Contributor to Eclipse Langium development, worked on Langium-based DSL projects
- Project lead, developing legacy DSL support with a Sprotty (graph-based) graphical projection
- Provided assistance to other projects, took leadership with client interactions and driving language support development
- Authored early Langium guides and videos to drive adoption
- Provided DSL consultation, was project lead on several U.S. and European client projects

Research Assistant **Jan 2020 – Jun 2021**
Programming Languages Group, OSU *Corvallis, OR*

- Developed BoGL, an educational programming language in Haskell, and studied its classroom impact
- Researched classification and ordering systems for guiding the presentation of programming examples
- Engineered and maintained OSU's BoGL stack on Amazon EC2
- Developed the Childsplay research group showcase site (research.engr.oregonstate.edu/childsplay) for BoGL

Head Software Engineer & Co-Founder **Jan 2015 – Sep 2017**
Axolsoft *Upland, CA*

- Co-founded a software LLC and ran day-to-day operations; delivered full-stack web projects for clients
- Built CRM and payment portals (PHP, SQL, Braintree) and maintained Ubuntu server infrastructure

Education

Oregon State University (OSU) **Corvallis, OR**
M.S., Computer Science Sep 2019 – Jun 2021

- Focus: Programming Language Theory, Computer Graphics, AI

Oregon State University (OSU) **Corvallis, OR**
B.S., Computer Science Sep 2016 – Jun 2020

- Cum Laude, Computer Systems option (type theory, parsers, syntax & semantics)
- Wrote the educational domain-specific language BoGL with capstone team

Skills

Languages (strong): TypeScript, JS, HTML, CSS, C, Bash
Languages (familiar): Python, Zig, Haskell, Go, Java, PHP, Lua, C++, MySQL
Tooling: LSP, VSCode (extensions), Docker, Ansible, Git
Platforms: VSCode (extensions), Custom IDEs (Monaco-based), Ansible, Nix, Forgejo, Linux
Interests: Embedded Systems, Electronics, CAD, 3D Printing, Homelabbing, Restoration & General Repair, Gardening
